MAJESTIC APEX PREDATOR

Taimen is a valuable fish species and this is due to its large size, and its fighting behavior during angling. They are so aggressive and will chase and attack any baitfish or lure in their zone just because it's there. These fish are fierce predators that sometimes chase their prey in packs, a practice that earned them the nickname "river wolves." Our walk and wade adventures allow you to cover a lot of water effectively, while enjoying the beauty and serenity of the picturesque nature surroundings.
